

CONFERENCE
RECYCLING OF END-OF-USE VEHICLES IN THE COUNTRY
AND WORLDWIDE

WARSAW 13TH -14TH OF SEPTEMBER 2023

Review of the national end-of-life vehicle recycling systems

Topics to be presented by each country:

1. Market size:

- number of registered vehicles,
- the number of vehicles recycled at legal disassembly stations - per year,
- the number of currently operating legal vehicle dismantling stations and cars body shredders,
- the size of the shadow economy expressed as a percentage - the scale of the shadow economy.

2. Methods and systems preventing the development of the shadow economy - existing and planned.

3. The role of individual operators in the end-of-life vehicle recycling system:

- vehicle manufacturers/ importers,
- operators of vehicle disassembly stations,
- operators of cars shredders and operators of other installations for processing waste from vehicles,
- insurers.

4. Disassembly parts market:

- market size, parts distribution methods,
- are there any restrictions on the trade in parts intended for reuse from disassembly?
- what are the tax burdens on the sale of used parts – is tax on the margin or on the whole?

5. Electric and hybrid vehicles:

- requirements for disassembly stations and employees,
- percentage share in the market of hybrid electric vehicles,
- are there facilities to process batteries from hybrid or electric vehicles?
- what are the economic conditions for the transfer of batteries from hybrid or electric vehicles -who pays whom?

6. Theft of catalysts - the scale of the problem and methods of preventing theft.

7. Types of waste with which disassembly stations have the biggest problem when it comes to their management.

8. Other innovative - legal or technical solutions related to the recycling of end-of-life vehicles.

Estimated presentation time ca 40 minutes
